Eberhard Muench

In collaboration with Eberhard Muench we could perform various works in glass, such as:

- Babenhausen
- Herborn

Free evangelical church Herborn

If glass paint is handled correctly, it also has a light filtering effect, as you would expect them rather of full tinted glass

Processed in airbrush technique offers a large range of glass paint design with high durability, as the color is baked in the oven

Emmaus community Babenhausen

In Babenhausen the airbrush technique was combined with glued mouth-blown flashed-glass.

In addition, the slices of Eberhard Muench were etched dull in wiping technique.

The individual panes in the stairwell vary in their design and give so freely and consciously exciting views and insights.

The glass design by Erberhard Muench starts in his wall design and it is continued on the window.
