Windows - the classic setting for glass design

Everyone knows designed windows – whether in churches, private homes or public buildings.

Very early on, window panes evolved from mere closure for a room to works of art. Today, the possibilities for glass design in windows are veritably infinite.

- Lead glazing
- Glass painting
- Fusing technique
- Glass painting
- Digital direct printing
- Adhesion techniques
- Sandblasting etc.

Let yourself be inspired to also design your windows!

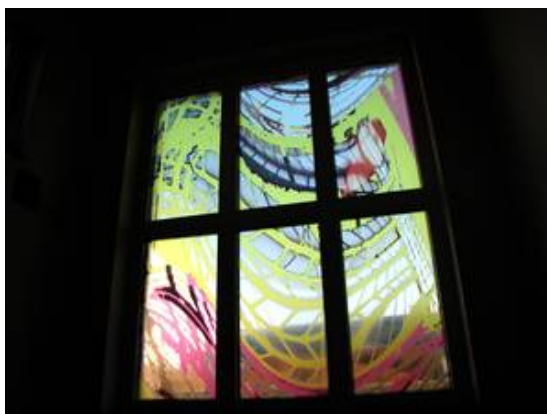

Instead of common ornamental glass, this bathroom window features an installed melted-glass pane (Fusing pane) with shaped mussels and sea stars.

Another example of a different kind of blind in a bathroom – here, as leaded glass with glass painting, design and glass painting by Curd Lessig

An unusual window shape, designed in classic leaded glass in modern arrangement, according to designs by Sabine Wiedemann
