Glass ceilings have a fascinating effect on a space

New products for private residences or public spaces (such as the casino in Bad Füssing) are constantly developed in close co-operation with the planner and the customer.

The possibilities for design and implementation are indeed most diverse.

Please make an enquiry to this effect.

Glass ceiling in Fusing technique in the great gaming hall of the state-operated casino in Bad Füssing, architecture firm Alexander Freiherr von Branca

Of course, we also conserve historic glass ceilings, such as the glass ceilings in the lobby in Bad Kissingen. In this photo, you see the large glass ceiling with 240 individual leaded glass, partially featuring glass painting.

You can find out more about our services in the field of conservation [here](#).
