

In the area of application "Interior Lighting", we offer you four product families:

All of our interior light fixtures are manufactured as a rule only after you place your order. This gives you the opportunity to individualise the light fixture in your order. Also, the light fixtures can be manufactured with different types of glass and different surfaces.

Exterior light fixtures are derived from the shape of several interior light fixtures; this enables you to comprehensively implement your already-planned lighting concept.

If you are unable to find a particular interior-light-fixture shape in the

exterior-light-fixture catalogue, then please ask us whether we can also manufacture this light fixture for exterior use.

- Würzburg lead light fixtures
- Matted light fixtures
- Recycline
- Würzburg manufactory light fixtures
- White Series

You can easily find light fixtures which feature energy-saving bulbs in our [product search](#) by entering the keywords ""TC"" (up to 84% Energy savings), ""HIT"" (up to 85% Energy savings), ""QT"" (up to 27% energy savings) in the field ""Keyword Search"". Please note that currently, not all available light fixtures are included in the database.

You will find further information on practical lighting in the following sections: [Energy-efficient lighting](#) and [Light planning](#)"
