

Some introductory words on our business unit "lighting"

Since 1978, we have manufactured light fixtures in series with quantities ranging from one to several hundred units.

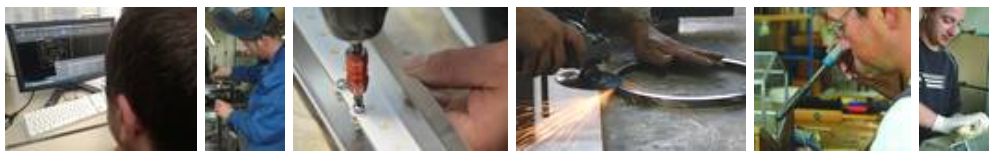

Consultation, relevance to customers and variability have the highest priority in our production!

So you can realize the different requirements in terms of **energy efficiency**, lighting requirements and effect of light from one source.

In this context, there is usually a direct relevance to the object. Therefore, we also manufacture our serial light fixtures on short notice upon receiving an order, as you can find them in our catalogue and our product search on our Website.

The transition from serial to custom light fixtures – or further, to new products – is fluid and part of the work we do every day. We will gladly draft for you individual proposals and suggestions.

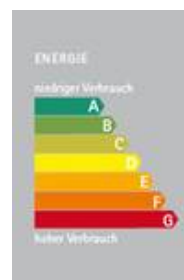

Over the years, we have added the following business units to our light-fixtures division:

- **Light-fixture conservation** and
- **Light-fixtures engineering**

as a logical supplement to our range of offerings.

In this context, we had the privilege to realise numerous objects in the public, private and sacral spheres.

Whether in churches and monasteries, the Vatican (Santa Maria della Pietá in

voller fixen Kombinationsmöglichkeiten...

Ihre Möglichkeiten...

Bringen Sie Farbe in Ihr Leben

Hochwertige Handwerkskunst aus der traditionsreichen Glashütte Lamberts im Zusammenspiel mit modernen Energiesparleuchtmitteln und der soliden Arbeit unserer Leuchtenmanufaktur bilden die Basis für diese Leuchtenserie.

Die mundgeblasenen Glastafeln der Glashütte Lamberts mit Ihren mehr als 5.000 Farben sind für Sie der Garant an Individualität und hochwertigste Farbglassgestaltung.

Leuchtende Farben von unnachahmlicher Brillanz geben diesem Glas das unvergleichliche Flair.

Erfahren Sie hier mehr über diese Leuchtenserie!

Because safety is always in our heart, we let test our main models by VDE. Under our own quality assurance we do a 100% final inspection of

each and every illumination and chandelier.

VDE also performs regularly appropriate plant inspections.

For this purpose, we have a test system with high voltage test, insulation resistance measurement, PE test, continuity and short circuit test for manual or fully automatic menu driven test procedures. This is complemented by a software-based quality assurance system.

You, too, can benefit from our many years of experience – just take the opportunity for a non-binding consultation to individualise your light fixtures!

Just send us a **e-mail** or phone us.

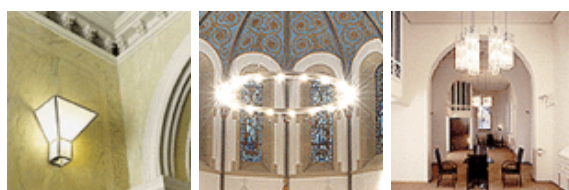

We offer you the following product ranges:

Manufactory light fixtures
