Würzburg manufactory light fixtures – a wide spectrum of diverse solutions

As it happens so often, this product family of light fixtures was designed based on feedback from planners who were at the time unable to find the right light fixture on the market to suit their own planned construction project.

This is how the first light fixtures were developed in co-operation – and over the years, this product family of light fixtures emerged.

1. A high degree of custom design options – either at no extra charge or subject to a minimal surcharge

- Surfaces
 - Various powder coatings, etc.
 - liquid coatings, i.e., DB 701 or 703 etc.
 - galvanic surfaces such as, gloss gold plating; matte nickel stainless-steel surface; Matte gold refurbished; Galvanically gold-plated; Glossy copper, coated etc.
- Number of illuminants
- if required, also dimensions

2. Supplementation of serial light fixtures by structurally-similar custom light fixtures – in most cases, quick and uncomplicated umsetzbar

3. Numerous modern **and effective illuminants** also, different illuminants can be made in the same or similar light-fixture shapes, i.e.:

- HIT-DE
- TC-F
- HIT-TC-CE
- LED
- ...

Finding light fixtures with energy-saving bulbs is simple: just search our **Produktsuche** database by entering "TC", "HIT" etc. in the field "Keyword Search". Please note that currently, not all of our available light fixtures are included in this database.

You will find further information on practical lighting in the following sections: **Energy-efficient lighting** and **Light planning**.
