

Matted light fixtures - Design and glare protection

Matted light fixtures were developed to offer you the possibility to even better suit lighting to your desired design and minimise glare.

Also, matted light fixtures enable you to permanently affix corporate logos, house numbers, room numbers, coats of arms or similar items to your light fixtures.

- Wall-mount light fixtures
- Ceiling-mount light fixtures
- Suspended light fixtures
- Exterior light fixtures

Of course, the illuminant casings for our chandeliers are also available in a matted version as per your request.

Therefore, light fixtures with matted casings have always been available in various other light-fixture product families in addition to our own product line "Matted Light Fixtures" (ML):

- Würzburg lead light fixtures
- Würzburg manufactory light fixtures

With the matted panes, these light fixtures are also well-suited for energy-saving illuminants.

In our [product search](#), you will find matted light fixtures by entering in the field "Type Designation" the abbreviation "ML" for "Matted Light Fixtures".
