

## TV images of our conservation works

16.08.2010

In our conservation works, two TV stations covered the conservation works and its projects.

The networks "Bayerisches Fernsehen" and "Kirchen-TV" took this opportunity to shoot some footage during our work on the medieval stained glass featured at the Herrgottskirche in Creglingen.

While the footage shot by Kirchen-TV concentrated solely on Creglingen, the footage shot by Bayerisches Fernsehen was designated for use in various productions.

In addition to its use in the context of the programs "Frankenschau" and "Abendschau", a report on the recognised occupation of glazier/artistry glazier (which requires formal training) or a company portrait in the context of the celebration of our company's 130th anniversary.
