

Doors with glass design – receive your guests with style!

Particularly doors lend themselves to glass designs; as a result, your visitors step into your house - and with that, you can immediately give the right impression with an individual glass design.

In this context, the design techniques are diverse, i.e.:

- Leaded glass
- Glass painting
- Fusing technique
- Glass painting
- Digital direct printing
- Adhesion techniques
- Sand-blasting etc.

The design can be implemented according to your own ideas or designs by artists.

Automatic sliding glass door with affixed, hand-blown real-antique flashed glass pane in almost original size of about 900 x 640 mm and sandblasting as privacy protection in the lower area

Screen printing in the door of a partition wall, in the New Minster at Würzburg

Detail of the screen printing, design by Klaus Zschka

A double-winged door in the Fusing technique, design as per the customer's request

Sand-blasted glass doors for the hotel Koenigshof in Munich

A double-winged door with sandblasted panes in an apartment

Entry door in the Fusing technique, design as per the customer's request
