

ROTHKEGEL

Glasgestaltung · Glasrestauration · Glastechnik · Leuchtenmanufaktur · Leuchtentechnik

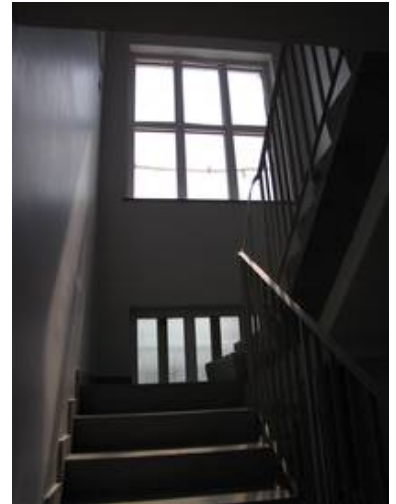

Also modern design techniques can be protected from damage with our UV protection

as was done here for a commercial building in downtown Augsburg.

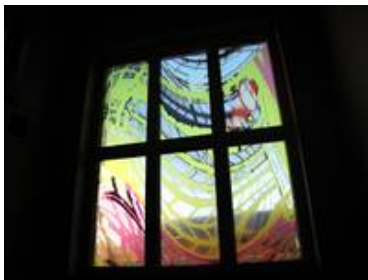

Glass design with digital direct printing (according to a design by Rita de Muynck) in a three-fold insulated glazing with a Ug value of approx. 0.6 W/m²K and integrated UV protection for digital printing:

- ESG made of 4 mm float glass, with single-colour digital printing
- Between glass panes: 14 mm (spacers grey), argon filling
- Laminated safety glass made of 2 x toughened safety glass, made of float glass 4 mm with coating und UV++ PVB film for especially long-lasting lightfastness
- Between glass panes: 14 mm (spacers grey), argon filling
- Toughened safety glass made of 4 mm float glass, coated

We will gladly also protect you modern art against photo-chemical aging.

The two empty windows in the stairwell before the new glass design

The upper window on a late summer afternoon

The bottom window separate the stairwell from a winter garden
