Waltraud A. Wille

In cooperation with Waltraud Will we were allowed to perform various of her designs in glass:

- Objectpane in the Knauf Museum Iphofen - techniques used: Stained Glass - Etching - stained glass - glass bonding technology Patch gold mask in the middle calyx (dark here due to the counter light)
- Stele: It spoke of you my heart: "search his face" Ps 27/8 - fused glass, oxidized metal, copper plate, screen printing by default a crucified (wooden cross / Chadenac, 12th c.). The decisive factor in this work is not the product as a result of the draft, but the act of creation. The action in itself is not the intent of destruction under, but concentration and humility to complete the work in the destruction, broken form that can be perceived again. The viewer is exposed to an event which necessarily also the vulnerability - including human dignity - wound.

- **Doors in fusing technique**

Objectpane Knauf Museum Iphofen

It spoke to you from my heart:
"search his face" Ps 27/8
