The "White Series" - subtle elegance and timeless beauty

The "White Series" within our light-fixture product line combines the traditional with the modern. Clear, contemporary design is produced with well-established technology and creates optimum lighting without glare.

This series of light fixtures was developed in the 1980s, specifically for the energy-saving bulbs which had just **been launched at the time**.

The special aspect of the "White glass" is its milky appearance. This material, incorporated in decorative glass design, combines soft light and the powerful illumination of a space.

Our "White Series" is displayed in all of its variation possibilities. It is displayed in exact detail, clear and practical in its design. Upon request, the individual lamps in this series can also be equipped with transparent glass frames (see the example here – at the University of Greifswald).

You can find light fixtures with energy-saving bulbs quite easily in our **Product Search**, by entering "TC" to the field "Keyword Search". Please note that currently, not all available light fixtures are included in the database.

You will find further information on practical lighting in the following sections: **Energy-efficient lighting** and **Light planning**

Residential building on the Levantkade, Prof. Kollhoff, WS 85/D 6 as a custom-made fixture

University of Greifswald, WS 89/P 4 T with custom-made panes by the palnner's request
